DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-29, drawn to an ultrasonic transducer assembly, classified in class 73, subclass 861.28.
 - II. Claims 30-40, drawn to a process for fabricating an ultrasonic transducer assembly, classified in class 29, subclass 592.1.
 2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are an apparatus and a process for fabricating (manufacturing).
 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
 4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
 5. During a telephone conversation with Kevin Mierzwa on December 2, 2004 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-29.
- Affirmation of this election must be made by applicant in replying to this Office action. Claims

Art Unit: 2855

30-40 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

6. The application has been amended as follows:

Claims 30-40 are canceled.

Allowable Subject Matter

7. Claims 1-29 are allowed. The following is an examiner's statement of reasons for allowance: The prior art of record, alone or in combination, fails to teach or fairly suggest an ultrasonic fluid flow assembly comprising: a piezoelectric transducer element having first and second contact surfaces with electroplated metallic film layers; a housing enclosing the transducer and conterminous with the outer surface of a flow duct; and means for conducting electrical signals between the electroplated first contact surface of the transducer and the outside of the housing; wherein the electroplated second contact surface of the transducer is solder-mounted in the housing such that the transducer element is thereby coupled to the outer surface of the duct in a conterminous fashion.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
